Factory Visit

30 guests visited the factory of Ichii's overseas branch in Indonesia in the afternoon of Day 2

ASEAN Automotive & Motorcycle Parts Manufacturing Summit 2020

October 22-23 | HOLIDAY INN CIKARANG JABABEKA
CIKARANG, Indonesia

- Indonesia intends to set up the goal of making electric vehicles account for a quarter of car production by 2030.
- New Indonesian regulations will require all electric vehicle manufacturers to gradually increase their locally manufacturing share, with a target of 80% in 2030, while electric vehicle manufacturers will target 80% locally made in 2026.
- The government is fully supporting the electric vehicle industry in order to reduce the country's dependence on petrochemical fuel imports. On the other hand, it also hopes to make good use of the rich nickel ore reserves in the country. This is one of the main materials for lithium batteries for electric vehicles. Battery recycling company, GEM from China and Hanwa from Japan have invested in Indonesia for this potential opportunity.

About Organizer

A series of conferences in S.E. Asia that cater specifically to industry verticals like metalworking technology, plastics processing, automotive, food beverage processing & packaging representing growth sectors in many S.E. Asia countries. These sectors require high levels of technology and upgrading to meet the growing needs of sophisticated consumers both domestically and for export markets.

Conferences organized by Ringier not only provide industry leaders with the latest technologies, but also help Greater China enterprises innovatively explore new markets. For more information, please visit www.ringierevents.com.

•The leading OEM from China have been active in the Indonesian market since 2017.

•--In 2017, **Wuling Motors** invested US \$ 700 million in a plant in Cikarang, West Java, which can produce 120,000 cars per year. 56% of auto parts for Confero is made in Indonesia, and Wuling has expanded local dealers from 35 to 80, creating 3,000 jobs for the Indonesia.

•-In 2018, **China DFSK** invested US \$ 150 million in Indonesia, and plans to build an engine plant in Indonesia. DFSK also plans to increase the number of dealers in Indonesia to 50.
